Peace of Mind

Thoroughbred Floats are 100% NZ made and owned. We use only the very best materials, resulting in high-strength, light-weight construction built to last.

Built with galvanised sheet metal that’s welded, not riveted, our entire chassis is hot-dipped galvanised, and we mount a single piece of 5mm marine-grade aluminium flooring onto it.

Our unique rocker equalising suspension offers the smoothest towing experience, one of the best on the market.

For peace of mind, your Thoroughbred Float has a high resale value, which makes it one of the best investments you’ll ever make.
